*Amendments to the Claims*

Claim 1 (Currently Amended):    A method for producing a show, comprising the steps of:

(a)    enabling creation of a script for the show, wherein said script ~~defines a set~~ <u>includes one or more sets</u> of production commands, said ~~script~~ <u>one or more sets</u> comprising one or more <u>pause commands, said one or more pause commands including instructions for defining one or more</u> segment files, each of said segment files comprising a ~~set~~ <u>group</u> of production commands that, when executed, operate to produce a segment of the show ~~having no predefined duration; and~~

(b)    executing said ~~set~~ <u>one or more sets</u> of production commands to thereby produce the show<u>; and</u>

<u>(c)    pausing from executing a next command in a segment file upon processing one of said pause commands.</u>

Claim 2 (Currently Amended):    A method of claim 1, further comprising the step of:

~~(c)~~<u>(d)</u>    executing commands to add a segment file to a show file prior to executing ~~the~~ <u>a</u> first production command within the ~~set~~ <u>group</u> of production commands corresponding to said segment file.

Claim 3  (Currently Amended):    A method of claim 2, wherein a

subsequent segment file is irreversibly appended to said show file prior to

executing ~~the~~ a first production command within the ~~set~~ group of production

commands corresponding to a preceding segment file.

Claim 4  (Currently Amended):    A method of claim 3, wherein the ~~set~~

group of production commands corresponding to ~~each~~ a subsequent segment file

includes instructions for transitioning from the preceding show segment to the

subsequent show segment.

Claim 5  (Currently Amended):    A method of claim 2, further

comprising the step of:

~~(d)~~(e)    executing commands to store said show file in a memory

means.

Claim 6  (Currently Amended):    A method of claim 1, further

comprising the steps of:

~~(c)~~(d)    executing commands to record ~~each~~ a show segment for

subsequent playback; and

~~(d)~~(e)    executing commands to integrate a segment delimiter for

~~each~~ a recorded segment with a segment file, said segment delimiter identifying

said recorded segment.

Claim 7 (Currently Amended):    A method of claim 6, wherein said

segment delimiter identifies the start a starting point of said recorded segment.

Claim 8 (Currently Amended):    A method for producing a show,

comprising the steps of:

   (a)    enabling creation of a script for the show, wherein said script

defines a set includes one or more sets of production commands, said script one

or more sets comprising one or more pause commands, said one or more pause

commands including instructions for defining one or more segment files, each of

said segment files comprising a set group of production commands that, when

executed, operate to produce a segment of the show having no predefined

duration; and

   (b)    executing said set of video one or more sets of production

commands to thereby produce the show;

   (c)    executing commands to add a segment file to a show file

prior to executing the a first production command within the set group of video

production commands corresponding to said segment file; and

   (d)    pausing from executing a next command in a segment file

upon processing one of said pause commands.

Claim 9 (Currently Amended):    A method of claim 8, wherein a

subsequent segment file is irreversibly appended to said show file prior to

Snyder *et al.*
Appl. No. 09/488,578

executing ~~the~~ a first production command within the ~~set~~ group of production

commands corresponding to a preceding segment file.

Claim 10 (Currently Amended): A system for producing a show,

comprising:

a processing unit in communication with a one or more production

devices;

generating means for enabling creation of a script for the show,

wherein said script ~~defines a set~~ includes one or more sets of production

commands, wherein said ~~script comprises~~ one or more sets comprise one or more

pause commands, said one or more pause commands including instructions for

defining one or more segment files, wherein each of said segment files comprise a

~~set~~ group of production commands that, when executed, operate to produce a

segment of the show ~~having no predefined duration~~; ~~and~~

executing means for executing ~~each production command within~~

~~said set~~ said one or more sets of production commands to thereby produce the

show; and

pausing means for pausing from executing a next command in a

segment file upon processing one of said pause commands.

Claim 11 (Currently Amended): A system of claim 10, further

comprising means for executing commands to add a segment file to a show file

prior to executing ~~the~~ a first production command within the ~~set~~ group of

production commands corresponding said segment file.

Claim 12 (Currently Amended):    A system of claim 11, further

comprising means for executing commands to irreversibly append a subsequent

segment file to said show file prior to executing ~~the~~ a first production command

within the ~~set~~ group of production commands corresponding to a preceding

segment file.

Claim 13 (Previously Amended):    A system of claim 11, further

comprising memory means for enabling storage of said show file.

Claim 14 (Currently Amended):    A system of claim 10, further

comprising:

        means for executing commands to record ~~each~~ a show segment for

subsequent playback; and

        means for executing commands to integrate a segment delimiter

for ~~each~~ a recorded segment with a segment file, wherein said segment delimiter

identifies said recorded segment.

Claim 15 (Currently Amended):    A system of claim 14, wherein said

segment delimiter identifies ~~the start~~ a starting point of said recorded segment.

Claim 16 (Currently Amended):    A method for producing a show,

comprising the steps of:

(a)    receiving verbal instructions and converting said verbal

instructions into signals to enable creation of a script for the show, wherein said

script ~~defines a set~~ includes one or more sets of production commands, said script

one or more sets comprising one or more pause commands, said one or more

pause commands including instructions for defining one or more segment files,

each of said segment files comprising a ~~set~~ group of production commands that,

when executed, operate to produce a segment of the show ~~having no predefined~~

~~duration~~;

(b)    executing said ~~set~~ one or more sets of production commands

to thereby produce the show; and

(c)    pausing from executing a next command in a segment file

upon processing one of said pause commands.

Claim 17 (Currently Amended):    A system for producing a show,

comprising:

a processing unit in communication with a one or more production

devices;

means for receiving verbal instructions and converting said verbal

instructions into signals to instruct said processing unit to create a script for the

show, wherein said script ~~defines a set~~ includes one or more sets of production

commands, wherein said ~~script comprises~~ one or more sets comprise one or more

Snyder *et al.*
Appl. No. 09/488,578

pause commands, said one or more pause commands including instructions for

defining one or more segment files, wherein each of said segment files comprise a

~~set~~ group of production commands that, when executed, operate to produce a

segment of the show ~~having no predefined duration~~; and

executing means for executing said ~~set~~ one or more sets of

production commands to thereby produce the show; and

pausing from executing a next command in a segment file upon

processing one of said pause commands.

Claim 18 (Currently Amended):    A method for producing a show,

comprising the steps of:

(a)    creating a script for the show to define ~~a set~~ one or more sets

of production commands, said ~~script~~ one or more sets comprising one or more

pause commands, said one or more pause commands including instructions for

defining one or more segment files, each of said segment files comprising a ~~set~~

group of production commands that, when executed, operate to produce a

segment of the show ~~having no predefined duration~~;

(b)    executing said ~~set~~ one or more sets of production commands

to thereby produce ~~each segment of~~ the show; ~~and~~

(c)    pausing from executing a next command in a segment file

upon processing one of said pause commands; and

~~(c)~~(d)    distributing a show segment over a computer network to a

destination.

Snyder *et al.*
Appl. No. 09/488,578

Claim 19  (Currently Amended):    The method of claim 18, further comprising the step of:

(d)(e)   receiving, from said destination, a request to distribute one or more show segments prior to executing step (c)(d).

Claim 20  (Currently Amended):    The method of claim 19, further comprising the step of:

(e)(f)   defining a set of commands corresponding to said one or more segments that, when executed, enables selection of said one or more show segments for distribution.

Claim 21  (Currently Amended):    The method of claim 20, further comprising the step of:

(f)(g)   accessing a segment delimiter to enable selection of a show segment for distribution, said segment delimiter identifying and/or describing the content of said selected show segment.

Claim 22  (Currently Amended):    The method of claim 20, further comprising the step of:

(f)(g)   defining commands that, when executed, enable distribution of said selected one or more show segments over the global Internet to said destination.

Claim 23  (Currently Amended):    The method of claim 20, further comprising the step of:

(f)(g)    defining commands that, when executed, enable distribution of said selected one or more show segments to comply with the Internet Protocol defined in Internet Standard 5, RFC 791, for transport over said computer network.

Claim 24  (Currently Amended):    The method of claim 18, further comprising the step of:

(d)(e)    defining commands that, when executed, distributes data related to said show segment to said destination.

Claim 25  (Currently Amended):    The method of claim 18, further comprising the step of:

(d)(e)    distributing said show segment over a wireless network to said destination.

Claim 26  (Currently Amended):    A method for producing a show, comprising the steps of:

(a)    creating a script for the show to define a set one or more sets of production commands, said script one or more sets comprising one or more pause commands, said one or more pause commands including instructions for defining one or more segment files, each of said segment files comprising a set

Snyder *et al.*
Appl. No. 09/488,578

group of production commands that, when executed, operate to produce a

segment of the show ~~having no predefined duration~~;

(b)    executing commands to integrate at least one segment

delimiter with ~~each~~ <u>at least one</u> segment file, said segment delimiter identifying a

segment produced from a corresponding segment file; ~~and~~

(c)    executing said ~~set~~ <u>one or more sets</u> of production commands

to thereby produce ~~each segment of~~ the show<u>; and</u>

<u>(d)    pausing from executing a next command in a segment file</u>

<u>upon processing one of said pause commands.</u>

Claim 27  (Currently Amended):    The method of claim 26, further

comprising the step of:

~~(d)~~<u>(e)</u>    executing commands to distribute ~~each~~ <u>a</u> show segment,

upon production, to a destination.

Claim 28  (Currently Amended):    The method of claim 27, wherein step

~~(d)~~ <u>(e)</u> comprises the step of:

~~(e)~~<u>(1)</u>    executing commands to distribute data related to said

show segment to said destination.

Claim 29  (Currently Amended):    The method of claim 27, wherein step

~~(d)~~ <u>(e)</u> comprises the step of:

Snyder *et al.*
Appl. No. 09/488,578

(e)(1)    deploying a wireless interface to distribute said show segment to said destination.

Claim 30  (Currently Amended ):    The method of claim 26, further comprising the step of:

(d)(e)    receiving, from a destination, a request to distribute one or more show segments prior to said destination.

Claim 31  (Currently Amended):    The method of claim 26, further comprising the step of:

(d)(e)    accessing a segment delimiter to enable selection of a show segment for distribution to a destination.

Claim 32  (Currently Amended):    A method for producing a show, comprising the steps of:

(a)    enabling creation of a script for the show to define ~~a set~~ one or more sets of production commands, said ~~script~~ one or more sets comprising one or more pause commands, said one or more pause commands including instructions for defining one or more segment files, each of said segment files comprising a ~~set~~ group of production commands that, when executed, operate to produce a segment of the show ~~having no predefined duration~~;

Snyder *et al.*
Appl. No. 09/488,578

(b) executing ~~each production command within~~ said set one or more sets of production commands to thereby produce ~~each segment of~~ the show; and

(c) pausing from executing a next command in a segment file upon processing one of said pause commands; and

~~(c)~~(d) executing commands to distribute a show segment and data related to said show segment to a destination.

Claim 33 (Currently Amended): The method of claim 32, further comprising the step of:

~~(d)~~(e) executing commands to distribute an advertisement to said destination.

Claim 34 (Currently Amended): The method of claim 32, further comprising the step of:

~~(d)~~(e) executing commands to send media in response to a request for information related to said show segment.

Claim 35 (Currently Amended): The method of claim 32, wherein step ~~(c)~~ (d) comprises the step of:

~~(d)~~ (1) executing commands to distribute said show segment at substantially the same time as producing said show segment.
